Medtech Companies					
73998	1.2	Smart medical implants; launching revolutionary wirelessly powered and controlled implants; highly successful track record and experienced management team: broad implants product pipeline with high market potential!	Medtech (A)	VC/PE Cases (Series B to trade sale)	<input type="checkbox"/>
74093	1.3	Robust, all-in, digital, low-cost x-ray system, working effectively and durably under the most challenging conditions (tropical climates, electrical instabilities, shocks, etc.).	Medtech (A)	Start-ups (early stage)	<input type="checkbox"/>
71372	1.4	Medtech diabetes therapy based on more precise glucose measurement; a set of novel proprietary technologies enables the company to propose disrupting applications/products in drug delivery and in diabetes therapy	Medtech (A)	VC/PE Cases (Series B to trade sale)	<input type="checkbox"/>
74125	1.7	Disruptive cloud-based medical SW solution to manage patient data. Software already on the market	Medtech (A)	Business Development	<input type="checkbox"/>
74098	1.12	Cooperative enabling for secure storage, management, and controlled access to individual personal health data.	Medtech (A)	Business Development	<input type="checkbox"/>
74065	1.17	Minimally-invasive and non-invasive multi-parameter neuromonitoring system for patients with traumatic brain injuries based on near infrared spectroscopy.	Medtech (A)	Start-ups (early stage)	<input type="checkbox"/>
74135	1.18	Patented minimally invasive trans-femoral mitral valve repair system with positive pre-clinical results and huge market potential.	Medtech (A)	Start-ups (early stage)	<input type="checkbox"/>
74344	1.22	A novel accessory to endoscopes reducing patient intervention and procedure time	Medtech (A)	VC/PE Cases (Series B to trade sale)	<input type="checkbox"/>
74352	1.23	Developing a new gold standard for shielding patients and healthcare workers against healthcare-associated infections and epidemics	Medtech (A)	Start-ups (early stage)	<input type="checkbox"/>
74358	1.24	Has developed compression clothing with high quality textile sensors, high-end microchips and state-of-the-art software solutions to create the best and most intelligent clothing.	Medtech (A)	VC/PE Cases (Series B to trade sale)	<input type="checkbox"/>
74360	1.25	Award-winning start-up has developed a revolutionary medical device for blood purification which allows specific and direct removal of disease-causing substances from the blood stream of a patient.	Medtech (A)	Start-ups (early stage)	<input type="checkbox"/>
74384	1.26	Most advanced Artificial Intelligence (AI) powered analysis of ECG and heart rate data in an arm band for various medical and life style applications.	Medtech (A)	Start-ups (early stage)	<input type="checkbox"/>
74421	1.27	A disposable medical device with a user-governed valve for the treatment of female stress incontinence	Medtech (A)	Go-to-market	<input type="checkbox"/>
74468	1.28	A bio-engineered autologous skin-graft for the permanent treatment of skin defects	Medtech (A)	VC/PE Cases (Series B to trade sale)	<input type="checkbox"/>
74475	1.29	Novel IOT approach to long-term holter ecg with unreached precision and reproducibility.	Medtech (A)	Start-ups (early stage)	<input type="checkbox"/>

Internal No	No	Short description of the Company	Sector	Stage of Financing	Interest
Biotech & Biopharma Platform Technology Companies					
74041	2.1	An FDA / EMA approved therapy for non-melanoma skin cancer. Best-in-class therapy for a growing wide-spread disease. Mainly seeking fundings to develop the US market (high potential for fast growth)	Biotech (A)	VC/PE Cases (Series B to trade sale)	<input type="checkbox"/>
73926	2.2	Swiss medical clinic in the Bahamas with license for stem cell preservation and treatment (MSCs); isolation, banking and cellfree therapies with secretomes from adult, adipose mesenchymal stem cells; patented method for producing secretomes.	Biotech (A)	VC/PE Cases (Series B to trade sale)	<input type="checkbox"/>
74055	2.3	Developing a novel oral anti-diabetic agent with a fast-track clinical development program.	Biotech (A)	VC/PE Cases (Series B to trade sale)	<input type="checkbox"/>
74068	2.4	Clinical-grade stem cell manufacturing company with a program for alzheimer therapy in clinical trial Phase IIa; one of the leading global stem-cell companies	Biotech (A)	VC/PE Cases (Series B to trade sale)	<input type="checkbox"/>
74064	2.6	Innovative proprietary stem cell technologies for improving the treatment of cancer and for immune reconstitution	Biotech (A)	Start-ups (early stage)	<input type="checkbox"/>
10122	2.12	Sustainable, unique technologies for food and feed additives; Original Ingredients Manufacturer seeking partnerships with food, feed, wine and cosmetics producers and marketers	Biotech (A)	VC/PE Cases (Series B to trade sale)	<input type="checkbox"/>
74303	2.13	Ground-breaking novel, natural health and productivity enhancers for the livestock industry helping to reduce antibiotics	Biotech (A)	Business Development	<input type="checkbox"/>
74310	2.15	Develops a small molecule for the treatment of cancer and Multiple Sclerosis. Phase IIa	Biotech (A)	VC/PE Cases (Series B to trade sale)	<input type="checkbox"/>
74309	2.16	A biotechnology company, focused on potent small molecules derived from natural product, to overcome tumor resistance, for safer and more efficacious cancer therapies.	Biotech (A)	Start-ups (early stage)	<input type="checkbox"/>
74312	2.17	An initiative to develop an oral generic formulation of an intravenous anti-cancer drug.	Biotech (A)	VC/PE Special Case	<input type="checkbox"/>
74299	2.19	Biopharma company developing therapeutics for rare kidney diseases. The opportunities all have near term proof of concept.	Biotech (A)	Start-ups (early stage)	<input type="checkbox"/>
74355	2.20	A clinical stage pharmaceutical biotech company developing new medications against chronic immune disorders, focusing on Immune-Mediated Inflammatory Diseases (IMIDs) such as psoriasis, arthritis and multiple sclerosis.	Biotech (A)	VC/PE Cases (Series B to trade sale)	<input type="checkbox"/>
74382	2.21	A pioneer and market leader in epigenetic medicine, producing and marketing specific food additives based on proprietary know-how. Mainly targeting various metabolic disorders, fatty liver, and type-2 diabetes.	Biotech (A)	Market Expansion	<input type="checkbox"/>
74383	2.22	Has developed a faster process for finding vaccine candidates based on a patented biomolecule copier. Will reach breakeven in 2022.	Biotech (A)	VC/PE Cases (Series B to trade sale)	<input type="checkbox"/>

Internal No	No	Short description of the Company	Sector	Stage of Financing	Interest
19900	2.23	A service provider in Biotech specialized in elucidating protein-protein interaction in living cells focusing on the cell membrane.	Biotech (A)	Business Development / M&A possible	<input type="checkbox"/>
74170	2.24	The leading proteomics company offering innovative services and products for highly multiplexed protein quantification.	Biotech (A)	Series C / Business Development	<input type="checkbox"/>
73979	2.25	A pharmaceutical company developing a life-saving therapy for liver disease patients. Seeking funds to complete the IND/CTA-enabling studies and perform a Phase IIa.	Biotech (A)	VC/PE Case (Series B)	<input type="checkbox"/>
74402	2.26	3D microtissue engineering and novel scaffold-free 3D cell culture technologies; a fast growing company revolutionizing in-vitro screening in drug discovery	Biotech (A)	Business Development	<input type="checkbox"/>
74484	2.27	Develops silicate-based nano-/microparticles for compound delivery and superior nanocomposite. Through partnering, in-licencing, and joint ventures, they add value to existing compounds by superior compound delivery.	Biotech (A)	Business Development	<input type="checkbox"/>
Other Life Sciences and related Companies					
74272	3.4	Has developed a new generation blood-based test for early detection of colorectal cancer. The test is clinically validated and available in Switzerland.	Diagnostics (A)	Business Development	<input type="checkbox"/>
74353	3.5	Multivalent Compounds for Use in the Treatment and Prevention of Brain Damage	Diagnostics (A)	VC/PE Cases (Series B to trade sale)	<input type="checkbox"/>
74054	4.1	Swiss primary care medical centre chain, offering real estate combined with healthcare investment opportunities; fast growing chain with individual investment opportunities into integrated real estate with clinic, care for elderly and retirement homes	Healthcare (A)	VC/PE Cases (Series B to trade sale)	<input type="checkbox"/>
74128	5.1	Proprietary, patented product for the treatment of herpes simplex. Seeks funding for the financing of worldwide marketing. Highly successful on the European market.	Cosmetics	VC/PE Cases (market entry)	<input type="checkbox"/>
74307	5.2	An application for women that shapes the appearance of the skin, specifically with Cellulite. The product is ready to market.	Cosmetics	Market Expansion	<input type="checkbox"/>
74253	5.3	Thermo-sensitive hyaluronan resistant to enzymatic degradation due to the spontaneous formation of spherical particles (submicron hyaluronan pearls)	Cosmetics	Start-ups (early stage)	<input type="checkbox"/>
74254	5.4	A unique proprietary technology platform for designing innovative, highly purified Hyaluronic Acid based facial and body fillers.	Cosmetics	Start-ups (early stage)	<input type="checkbox"/>
74296	5.5	Redefining skin whitening with unique cosmeceuticals	Cosmetics	Start-ups (early stage)	<input type="checkbox"/>
74349	5.6	First truly effective method for tattoo removal based on a patented technology for the encapsulation of active agent.	Cosmetics	Start-ups (early stage)	<input type="checkbox"/>
74160	6.3	Babys Life is the world's first to develop and offer a new kind of pregnancy-specific liquid dietary supplement. First product established on the German market. Seeking financing for	Food & Beverages	Market Expansion	<input type="checkbox"/>
73647	7.1	Full workflow application orientated solutions for R&D in many industries; looking for business development partners	Life Sciences Suppliers (A)	Business Development / JV	<input type="checkbox"/>

Internal No	No	Short description of the Company	Sector	Stage of Financing	Interest
2112	7.2	Laboratory and process automation company with consistent automation solutions; established company with global reach seeking distribution-partnership opportunities	Life Sciences Suppliers (A)	Business Development	<input type="checkbox"/>
74126	7.3	Turnkey modular solutions for pharma development and production. French mother company provides a turnkey structure for the manufacturing and packaging of hemodialysis concentrates.	Life Sciences Suppliers (A)	Business Development / JV	<input type="checkbox"/>
74284	7.4	Market leader in providing synthetic hollow fiber extrusion lines and dialysis filter assembly lines.	Life Sciences Suppliers (A)	Business Development / JV	<input type="checkbox"/>
74099	8.1	Polymer actuators, sensors and generators based on Dielectric Elastomer (DE) technology. Application in medical technology as dosing systems	Materials Technology	VC/PE Cases (Series B to trade sale)	<input type="checkbox"/>
Hospitals / Clinics / other patient care					
74364	10.1	Clinic providing a holistic approach to medical wellbeing using a combination of innovative medical expertise and care. Reputation based on their exclusive rejuvenation treatment of Prof. Paul Niehans (1931)	Private clinic	Expansion / Business Development	<input type="checkbox"/>
73825	10.2	A high-end mental health and addiction treatment center covering the widest range of psychological and dependency disorders with bespoke care plans, in completely private and luxurious surroundings.	Private clinic	Expansion / Business Development	<input type="checkbox"/>
If you are looking for a specific range of technologies or would like to tell us in which area you are looking for technologies or partners, please specify here:				Sectors	
Your specific request:				Medtech	<input type="checkbox"/>
